

Residential Part 9 Air Barrier / Air Tightness

With Instructor **Andy Oding** of 

Don't miss this fundamental workshop for high performance home builders

Date: Wednesday, Sept. 26, 2018

Location: BILD Offices
20 Upjohn Rd, Toronto

Time: 8:30 AM-4:30 PM

\$259 + HST HBA member

\$309 + HST non-member

Group rates available.

Registration: www.enerquality.ca/training

Take an intensive one-day course covering key Residential Part 9 Air Barrier/Air Tightness, and learn how you can meet the current 2017 Ontario Building code for **less cost** (SB12) than prescriptive. Learn best practices, compile air barrier site-checklists, explore working details and more.

High performance air barriers and low infiltration rates are essential for ensuring healthy, comfortable, durable, efficient buildings and enclosure systems. Air tightness testing will become a common required practice for low carbon building codes and volunteer labeling programs (e.g. Net Zero, ENERGY STAR®).

What you will learn:

- Air tightness / air barrier Ontario Building code requirements
- Future potential code and program air testing requirements
- Air testing / blower door operation and testing protocol
- Best practice air barrier details, scopes of work and contracts.

What you will leave with:

- Certificate of completion and hard-hat sticker certifying trained status.
- Sample Site checklist for Air Barrier completion
- Sample Air Barrier details-best practice.

Participants say training

- "helped me feel more confident in my knowledge"
- "taught me what mistakes not to make"
- "provided good advice about the market and what's coming"

Who should attend: Builders • Contractors • Site supervisors • Foremen • Site service • Architects and designers (BCIN designates) • Contracts/Purchasing • Building Officials • Drywall contractors and Air barrier trade contractors • All trade contractors who interact with the envelope of a home

This workshop satisfies OAA and OBOA and other Continuing Education Credits
