20 Upjohn Rd, Toronto

$259 + HST HBA member   **$309 + HST** non-member   *Group rates available.*

Registration: www.enerquality.ca/training

Explore the new Canadian government's energy performance rating and labeling program for key consumer items – including houses – with building science expert Andy Oding. EnerGuide, used coast-to-coast, is a third-party certified, federal government- backed, home performance label that clearly and simply demonstrates that your home is built far better than code (at less cost than SB12 3.1.1 Prescriptive Compliance).

An EnerGuide rating, label and report will help your customers better understand their home's energy performance, validate that their new home *or* newly renovated home will result in lower energy use, lower utility bills ($) and better comfort and health.

The ERS label and report are an official record of a home's energy performance, comfort and health benefits and will support an increased resale value.

What you will learn:
- Current and future building codes
- Changing consumer expectations and key marketing messages for today's homebuyers.
- Introduction to the **new** ERS consumer label and report. The simple and clear label resonates with anyone as it is easy to understand
- Steps to applying the ERS program as a builder or renovator

Who should attend: Builders • Contractors • Renovation contractors • Architects • Developers • Manufacturers & distributors of high performance building products • Consultants • Technologists • Project Managers

This workshop satisfies OAA, PEO, AEE, OBOA and other Continuing Education Credits
